

MapeSound™

FPO
for position only

SOUND RESISTANT ACOUSTICAL PANELS

MapeSound acoustical panels are designed to reduce noises and vibration in any glazing application. The panels can be used with specially designed window and curtain wall systems to improve the acoustical performance of the complete system. Finishes and thicknesses can be selected to meet any design requirements. Panels can be incorporated into non vision areas of acoustical windows to enhance noise reduction.

PROJECT TYPES

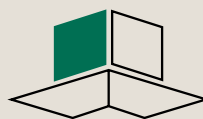

- Schools
- Hospitals
- Offices / Apartments / Libraries
- Airports

FEATURES

- S.T.C Up To 55
- Improved Thermal Insulation
- Available In All Architectural Finishes
- Designed For Use In All Sound Resistant Framing Systems
- LEED Credit

APPLICATIONS

- Noise Reduction
- Spandrel
- Window
- Curtain Wall
- Retrofit
- Transoms
